Great News! ADP® Makes Tracking Time and Running Payroll Easier...and More Accurate!

Managing time, attendance and payroll can get real complicated, real fast—especially for Dairy Queen® franchise operators that have dynamic staffing and scheduling needs. Think about this:

- Businesses that integrated time and attendance with payroll had an almost 30% lower rate of payroll processing errors[1]

- Businesses using automated time and attendance saw 57% fewer errors in PTO calculations[1]

Streamlining time and payroll is easier than you think!

WANT TO IMPROVE YOUR TIME AND ATTENDANCE SYSTEM?

RUN Powered by ADP (RUN) is the perfect payroll platform for Dairy Queen franchisees. Why? RUN allows you to import data from your time and attendance system into RUN each payroll, saving valuable time and helping to reduce the risk of data entry errors. RUN's time sheet import feature allows you to include imported payroll data in both regular and special payrolls.

HOW DOES IT WORK?

iPOS Payroll Interface provides a seamless interface between your POSitouch POS System and the RUN payroll platform. iPOS extracts employee punch data from your POSitouch system and prepares it for import into RUN.

WHY WOULD I CHOOSE TO INTEGRATE iPOS AND RUN?

- It's easy to use: iPOS was designed with restaurant managers and owners in mind, and the interface is easy and intuitive to use.

- It saves time and helps improve accuracy: Using iPOS to interface your POSitouch system with RUN can save you hours of manual data entry and also helps to ensure that your payroll data is entered correctly.
