Sage300CRE Integration
Built for ADP® Payroll

ADP Workforce Now®

In the past, Sage300CRE (Timberline) customers who wanted to outsource payroll needed to maintain payroll information in both Sage and outsourced Human Capital Management (HCM) system, perform dual entry of employees and projects in both systems and then reconcile the general ledger. That was then.

ADP helps Sage300CRE users save time and money by automating the critical data exchange between Sage300 and Payroll. ADP's Workforce Now® integration software allows companies to benefit from their preferred ERP functionality in Sage while outsourcing the compliance risk of payroll, HR and time & attendance. ADP delivers the data exchange that contractors need to transfer project data, general ledger and detailed job cost between systems.

Eliminate Dual Entry

ADP's integration software uses direct database access into Sage300CRE to retrieve project information and send to the ADP time & attendance system.

Send Job Costing & GL Information to Sage

Retrieves payroll-related expenses, calculates the critical labor and benefit burden and sends detailed costs for each job and general ledger journal entries from the previous pay period.

Automate Wage Decisions

For Davis Bacon projects or union jobs, ADP ensures that employees are being paid correctly. ADP helps you stay in compliance with government contracts by automating wage decisions for contract mandated prevailing wages, union wage scales and fringe benefits.

How You Benefit

✓ **No dual maintenance**
Use your preferred ERP (Sage300CRE) and ADP without dual maintenance

✓ **Eliminate risks and costs**
Eliminate compliance risk and costs of running payroll in-house

✓ **Easy to use**
Upload detailed wages, taxes and benefit burden costs to each job from ADP each pay cycle (in addition to General Ledger transactions)

✓ **Flexible**
Customization for prevailing wage and union rules

✓ **Accurate**
More accurate reporting and forecasting

✓ **Eliminate errors**
Eliminate costly and error-prone manual entry in multiple systems

The industry leader in employee data integration

ADP has helped thousands of companies automate manual, time-consuming processes previously being done on paper or spreadsheets. Our integration tools work with Time & Attendance, Payroll, Human Resources, Point-of-Sale, ERP, Mobile and many other systems to help enforce a company's specific pay policies and transfer data with your ADP systems.
